

Voiceover Pickup — Comprehension Questions

Prepared for: Content Narrator (same voice as Discovery Room facts, not the WiggleWoo character voice) · **Scope:** 80 lines

Every comprehension question currently shows text-only with no audio — the one remaining place in the app where a child who can't fully read yet has no way to know what's being asked. One combined line per question (prompt + all choices read together, friendly quiz-host style, small pause between choices).

Correct answers are not shown in this sheet — read every choice with equal, neutral energy; don't hint at which one is right.

Delivery

- **File type:** WAV, 44.1kHz, 16-bit or higher.
- **Naming:** Use the file names exactly — they map 1:1 to each fact's own ID in the code.
- **Trim:** ~100ms head/tail silence. **Normalize:** peak to -1dB, matching existing fact narration.
- **Wording:** a starting point, not locked in — reword for natural flow if needed. The file name is what matters for wiring it up.
