

## Voiceover Pickup — Round 3

**Prepared for:** Voice Actor(s) · **Scope:** 6 lines · **Tone:** Warm, encouraging, playful — friendly teacher / older sibling · **Pace:** Slightly slower than conversation

Two feature additions since the last pickup round wired new audio events into the game, but no lines have been recorded for them yet — they currently play silently (an intentional fallback, not a bug). **This is the complete list** — checked against every audio event in the game, not just the two features that prompted it.

### Section 1 — Word-Tac-Toe 4 lines

#### 1 "Let's play Word Tac Toe!"

word-tac-toe-intro.wav

**When played:** Once, ~400ms after the child picks their piece (X or O) and the board first appears.

**Direction:** Inviting, a little playful — kicking off a fun side activity, not a lesson. ~1.5–2s.

#### 2 "You got three in a row! Great game!"

word-tac-toe-win.wav

**When played:** The child's mark completes a line — the win celebration moment.

**Direction:** Big, genuine excitement — the payoff moment for the whole mini-game. ~2–3s.

#### 3 "So close! Want to play again?"

word-tac-toe-lose.wav

**When played:** WiggleWoo (the CPU) completes a line first.

**Direction:** Gentle, warm, zero-penalty tone — important. Losing to WiggleWoo should feel like a friendly nudge to try again, never a downer. Same encouraging register as the existing "wrong answer" retry lines. ~2s.

#### 4 "It's a tie — great game!"

word-tac-toe-tie.wav

**When played:** Board fills completely with no winner.

**Direction:** Upbeat, same energy as the win line but slightly less peak — still a good outcome. ~2s.

## Section 2 — Milestone Celebrations 2 lines

### 5 "You earned a trophy! Amazing work!"

celebrate-milestone-trophy.m4a

**When played:** Both the halfway (phase 1) and full (phase 2) trophy-earning moments — the single biggest celebration in the game.

**Plays under one of 3 random on-screen headlines** (line should work generically with any of them, not be locked to one):

Trophy Earned!

You Earned It!

Incredible Work!

**Direction:** The peak celebration line in the whole app — biggest energy allowed, genuine pride. ~2–3s.

### 6 "A brand new room is ready to explore!"

celebrate-milestone-unlock.m4a

**When played:** A new Discovery Room becomes available — 2nd biggest celebration, just under trophy.

**Plays under one of 3 random on-screen headlines:**

New Discovery Room!

Something New Awaits!

Unlocked!

**Direction:** Excited and inviting — building anticipation for exploring, not just "good job." ~2–3s.

#### Delivery

- **File type:** WAV, 44.1kHz, 16-bit or higher — same as every prior round, regardless of which folder each line ends up in on the production side.
- **Naming:** Use the file names above exactly (2 of the 6 end in .m4a in that column — deliver all 6 as WAV regardless; those two get converted during production, same as past rounds).
- **Trim:** ~100ms head/tail silence.
- **Normalize:** Peak to -1dB, matching prior rounds.
- **Wording:** A starting point, not locked in — the file name is what actually matters for wiring it up. Reword for flow or character if it helps the take.
